REQUIRED SAILS

- HEAVY WEATHER JIB
- STORM JIB

4.26.4(b) - for each storm or heavy-weather jib, a means to attach the luff to the stay, independent of any luff-groove device.

- A heavy weather jib shall have the means of attachment readily available.

- A storm jib shall have the means of attachment permanently attached;

REQUIRED SAILS

- STORM JIB

4.26.4(e) - A storm jib of area not greater than 5% height of the foretriangle squared, with luff maximum length 65% height of the foretriangle.

- HEAVY WEATHER JIB

4.26.4(f) - A heavy-weather jib (or heavy-weather sail in a yacht with no forestay) of area not greater than 13.5% height of the foretriangle squared and without reef points. Size approximately 90% or smaller.

REQUIRED SAILS

- STORM TRISAIL

4.26.4(c) - A storm trysail capable of being sheeted independently of the boom with area not greater than 17.5% mainsail luff length x mainsail foot length.

-The storm trysail shall have neither headboard nor battens, however a storm trysail is not required in a yacht with a rotating wing mast which can adequately substitute for a trysail;

4.26.4(d) - The yacht's sail number and letter(s) placed on both sides of the trysail (or on a rotating wing mast as substitute for a trysail) in as large a size as practicable.
