The handicaps of the 5 boats highlighted above have been revised from the first published list (june 20 04). In each case the handicaps are 6 seconds higher. The changes were required due to a programming error in the handicapping program. In the previous list the boats affected were handicapped based on an obsolete version of the VPP. Thank you to skippers, Larry Clark and Steve Tuck for helping to identify this error.

Good sailing, Don Martin, handicapper
